Immunisation Information

Please note the following information regarding immunisation details for your child.

“Under the Health (Immunisation) Regulations 1999, all parents/guardians are required to present an immunisation certificate for their child, obtained from the local municipal council, when enrolling their child in a primary school. Parents/guardians who present with certificates other than the one obtained from the council need to go to the council for the correct one.”

Parents/guardians who do not wish their children to be immunised must still obtain a certificate from the council. This will clearly state that the child has not been immunised.

Children who are not immunised must be excluded from school during outbreaks of diseases.”
